

Your trusted source for GDI Injectors and Seal Kits

GB Remanufacturing now carries the most extensive line of GDI injectors in the aftermarket. All GDI injectors are proudly remanufactured in the USA!

Next Generation Technology

Gasoline Direct Injection (GDI) is the next generation of fuel injection technology being used by vehicle manufacturers to improve fuel economy, reduce emissions and increase performance. Injecting fuel directly into the combustion chamber, the injectors operate between 1,500 psi and 7,250 psi depending on the vehicle manufacturer. In addition to GDI injectors, we offer an extensive line of GDI fuel injector seal kits.

Growing Popularity

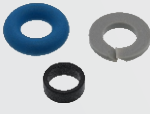

GDI technology will be used in over 72% of all new vehicles produced in 2021, and will be factory installed in over 17% of all vehicles in operation (VIO) by 2022.

Trusted Source

All of our remanufactured GDI injectors are tested at full rated pressure and operating parameters to ensure they meet exacting OE specifications. An extensive 24-month, unlimited mileage warranty assures the technician they are using the best injectors in the industry.

Additional coverage - GB carries over 1,100 multi-port and GDI injectors that cover over 68,000 unique vehicle applications. We are your trusted source!
