

ACDelco Advantage **COATED ROTORS**

With COOL SHIELD™ Technology and high quality engineering, to last longer and look better. Over 530 part numbers for over 90% all makes coverage.

The Coated Advantage - Helping to prevent rust corrosion

Coated rotors provide superior rust prevention compared to uncoated rotors, against the environmental elements such as rain, snow and corrosive liquid road sprays being used on your city streets. Our weather and these sprays have increased the rate of corrosion under a vehicle. Today's road conditions make this high quality engineered and superior rust preventing coated rotor the optimal choice.

Why ACDelco Coated Rotors?

- COOL SHIELD™ coated edges and vanes stay cleaner longer for optimal cooling
- Application specific vane configurations keep the rotor running cool and quiet
- Coated technology provides corrosion protection
- Entire rotor including it's interior has baked on coating for durability for long lasting rust protection compared to an uncoated rotor
- Robotic applied coating helps maintain the clean look of open wheel designs - no longer showcasing unappealing rust and corrosion

The Advantage

- Competitive price point for high quality engineered parts
- Mill-balanced for optimum weight distribution and brake performance
- Vane configuration and rotor plate thickness all match the application design
- Manufactured with multiple alloys for improved heat dissipation and performance

Importance of Correct Vane Configurations

- Vanes play a key role in safety and performance
- Specially designed shapes and placement of vanes help dampen noise and vibration and maximize airflow to keep rotor running cool (those that cannot dissipate heat properly can unexpectedly fail)

COMPETITIVE WARRANTY

2 YEARS / 40,000 KM LIMITED WARRANTY*

*Replacement parts only. Non-commercial passenger cars and light trucks only. Warranty against defective workmanship or material only. Excludes rust resulting from the removal of the protective coating due to brake friction, normal wear & tear and warping caused by the use of other parts in the braking system that are not approved by ACDelco. Other terms and limitations apply. See the customer warranty statement for details.

High quality material that provides corrosion protection
for safe, consistent and long lasting brake repairs.
